\$4.99 US

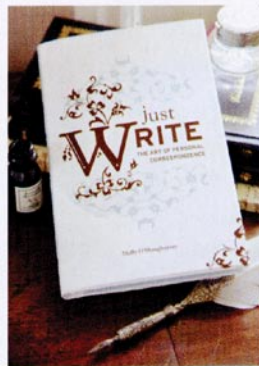

PLUS: *sweet tokens of affection for your valentine*

FAVORITE THINGS

Left: Classic lines and intricate details are the hallmarks of paper goods from Wiley Valentine. The company's name—a combination of the surnames of the two owners' grandmothers—is an homage to the women who inspired their creativity. Cards and coordinating envelopes with ornate flourishes are elegant without being overdone.

Above: *Just Write*, by Molly O'Shaughnessy, provides eloquent guidance for writing everything from greeting cards to a personal journal. The book makes a lovely gift for a young person just learning the beauty of the written word.

Below: Inspired by the days when desks were designed specifically for keeping up with correspondence, this petite table from French Heritage is just the right size for writing, with plenty of space to store papers and pens.

Above: Celebrate your inner royalty with playfully regal note cards from Alexa Pulitzer. Crowns, tiaras, and fleurs-de-lis adorn crisp white note cards, writing papers, and enclosure cards that are fit for a queen.
